Lahore Punjab Pakistan

Objective

Motivated and research-driven Chemistry undergraduate with proven academic performance and practical laboratory expertise. Passionate about nanotechnology and biomedical innovation, with a strong commitment to advancing healthcare through cutting-edge research. Seeking opportunities in research labs, fellowships, and internships to sharpen technical skills and contribute to impactful scientific breakthroughs.

Education

- **B.Sc. Chemistry**
 - University of the Punjab, Lahore, Pakistan
-

Research:

Final Year Reserach :

- **Evaluation and purification of phospholipid from natural source for sulforaphene liposomal drug delivery system .**
 - **Testing of ecofriendly zinc oxide nanoparticle for use in sunscreen. Course-Based Research Projects:**
 - Spectroscopic Analysis of Organic Compounds using UV-Vis and FTIR.
 - Thin Layer Chromatography (TLC) and HPLC for compound identification and purity testing.
 - Extraction and Quantification of Plant Alkaloids for pharmacological studies.
-

Professional Experience and Internships:

Pfizer UK Molecule to Market (June 15, 2026)

- Identified the clinical care pathway and prepared evidence to submit to NICE.

- Created a brand positioning statement and presented a pitch for the new medicine.
- Researched the needs of specific patient and customer types and created an effective go-to-market strategy.

LifeArc clinical Chemistry Job Simulation experience (June 3, 2026)

- Completed a simulation for experience involving PROTAC design, synthesis, and validation for LifeArc
- Designed PROTAC candidates from a library of components (anchors, warheads and linkers) and assessed the optimal conditions for their synthesis using click chemistry
- Interpreted data from validation experiments (Western blot and PAMPA assay)
- Summarised the background, results, and conclusions in a recorded presentation

Laboratory Intern / Volunteer – Punjab University Research Lab (2024–2025)

- Collaborated with senior researchers on instrumental analysis techniques. Assisted faculty in preparing reagents, sample analysis, and quality control protocols.
- Documented and analyzed results, contributing to research reports..

Certification :

- **ISO 22000: Food Safety Management System (FSMS) Certification** Issuing Organization: TUV Austria Burea of inspection and certification pvt.Ltd Completed: 22-5-2026

Skills

- **Laboratory Techniques:** Solvent extraction, centrifugation, TLC, FTIR, UV-Vis spectroscopy, HPLC titrimetric analysis.
- **Analytical Skills:** Research design, hypothesis testing, data interpretation.
- **Computational Tools:** ChemDraw, GraphPad Prism, Origin, Microsoft Word, Excel, PowerPoint. Soft Skills: Scientific writing, presentations, teamwork, leadership, problem-solving, time management.

Quality & Compliance

- Good Laboratory Practice (GLP) – Basic Knowledge
- Good Manufacturing Practice (GMP) – Basic Knowledge

- Laboratory SOP Documentation
 - Laboratory Safety
 - Chemical Safety
 - Data Integrity Awareness
 - Laboratory Record Keeping
-

Languages

- English
- Urdu
